

# Plast-E-Tint (PET)

## High Quality Color Concentrates for the Plastisol Marketplace

The Plast-E-Tint product line is a series of pigments dispersed in di-iso-nonyl-phthalate (DINP). The individual products have been specifically formulated for use in flexible vinyl applications. PET dispersions exhibit excellent color strength and suspension characteristics.

<b>Product Code</b>	<b>Color</b>	<b>Color Index</b>	<b>Heg. Grind (Minimum)</b>	<b>Density (lbs/gal)</b>	<b>Pigment</b>
PET-A102	White	WHITE 6	6.0	13.5	47%
PET-A207	Red Oxide	RED 101	6.0	13.1	40%
PET-A260	Red	RED 48:2	6.0	8.6	19%
PET-A310LF	LF Yellow	YELLOW 14	6.0	8.6	20%
PET-A369	LF Yellow RS	YELLOW 83	6.0	8.3	18%
PET-A555	Green	GREEN 7	6.0	8.6	9%
PET-A655*	Blue	BLUE 15:1	6.0	8.6	11%
PET-A701	Black	BLACK 6	6.0	9.2	27%

The products listed above are standard stocked items. However, specific colors, pigments, and loading levels can be readily formulated upon request.

### Applications

The loading levels of the Plast-E-Tint products are dictated by the type of pigment dispersed within the phthalate. They have been formulated to be high in tint strength and still maintain properties of a workable viscosity.
